**The Venturi Flow Meter with Magnehelic® Gage** is fabricated from aluminum and has a gradual Venturi profile to reduce pressure losses through the meter. Flexible connections enable the meter to be used in vertical or horizontal applications. The Magnehelic® gage provides a large, clear and accurate display of your differential pressure reading. Each meter is calibrated at standard atmospheric conditions. The dual scale reads in SCFM and in w.c. It is available in line sizes from 1˝ to 4˝ and can handle vacuum and positive pressures. The meter is supplied with easy to read reference charts for various flow conditions. Flexible connections enable the meter to be used in vertical or horizontal applications.
