**Digital Temperature Switch Probes & Accessories**

Probes to Be Used with TS2, TSS2, TSWB, TSW, TS3, TSX3, and 4OM

**Model TS485, RS-485 Serial Communications Module**

Connects to Configuration Key Port

The Model TS485 Serial Communications Module allows users to read the current temperature and parameter settings of the Love Controls family of temperature switches. The configuration key port on the temperature switch provides the data signal and power for the RS-485 module. For applications with multiple temperature switches, the modules can be daisy chained together so that only two wires need to be brought to the PC. The Model TS485 is compatible with Series TS3, TSX3, TCS, TS2, TSS2, and TSW.

**SPECIFICATIONS**

Compatible Devices: TS3, TSX3, TCS, TS2, TSS2 and TSW.

Communication Type: RS-485 full duplex.

Electrical Isolation: 2500 VAC.

Agency Approvals: CE.

**ACCESSORIES**

A-TS-AP, 1/4 DIN Steel Adapter Plate ........ $18.00

TS-W, Brass Thermowell (for use with TS-1, TS-11, TS-2, TS-21) .......... 7.00

TS2-K, Configuration Key ........... 89.00
