SERIES 265

PRECISOR® II PNEUMATIC AND ELECTRO-PNEUMATIC POSITIONER
Rotary Operation, Field Selectable Cam Design, 316 SS Models

PROXIMITY SERIES 265 PRECISOR® II PNEUMATIC AND ELECTRO-PNEUMATIC POSITIONERS combine outstanding performance with an extremely low price, making it an exceptional value for industrial applications. Rotary valves with single or double acting pneumatic actuators can be precisely controlled, such as our ball and butterfly valves. The PRECISOR® II positioner proportionally modulates the valve from either an electric 4 to 20 mA or pneumatic 3 to 15 psig input signal, based on the model chosen and is user-selectable for single or double action. Its rugged, durable design makes it ideal for use in harsh environments, while maintaining precise, accurate positioning of the control elements. Includes a bracket for mounting onto actuators with NAMUR standard connections, and features a versatile linear cam for direct action, reverse action, or split ranges.

FEATURES/BENEFITS
• Field selectable cam for direct or reverse acting
• User selectable single or double action
