Panel Meters/Indicators

Series APM when utilized with an ultrasonic level transmitter, such as the Mercoid OPEN CHANNEL FLOW CAPABILITY

- RS-232, RS-422/485 serial communication options
- External 4-relay & digital I/O expansion modules
- Rate displayed as units per second, minute, hour, or day
- Multi-pump alternation control
- 32-point linearization, square root or programmable exponent
- Math functions for flow & round horizontal tanks
- Digital panel meters.

It is possible to display flow rate and total at the same time, a very unique feature on a 1/8 DIN the lower line can display either flow rate, total, grand total, or engineering units. It is particularly well-suited for flow applications and can be programmed for a wide variety of units to accept 0 to 20 mA, 4 to 20 mA, 0 to 5V, or ±10V inputs and requires 85-265 VAC or 12/24 VDC power supply. Choose from RS-232, RS-422/485 serial communication options or any available expansion modules, accessories, and enclosures.

The APM is a 1/8 DIN digital panel meter specifically designed for displaying flow rate and total from a flow meter with an analog output such as 4 to 20 mA or 0 to 10V. The APM is particularly well-suited for flow applications and can be programmed for a wide variety of display configurations. The upper line can display either flow rate, total or grand total, and the lower line can display either flow rate, total, grand total, or engineering units. It is possible to display flow rate and total at the same time, a very unique feature on a 1/8 DIN digital panel meters.

FEATURES
- Three levels of password protection
- Math functions for flow & round horizontal tanks
- 32-point linearization, square root or programmable exponent
- Multi-pump alternation control
- Rate displayed as units per second, minute, hour, or day
- Total, grand total or non-resettable grand total
- Two or four relays & isolated 4 to 20 mA output options
- External 4-relay & digital I/O expansion modules
- RS-232, RS-422/485 serial communication options

OPEN CHANNEL FLOW CAPABILITY
Series APM when utilized with an ultrasonic level transmitter, such as the Mercoid Series ULT, provides an economical way to measure open channel flow.

DIFFERENTIAL PRESSURE FLOW
The APM can display flow rate and total by extracting the square root from the 4 to 20 mA signal from a differential pressure transmitter, such as the Dwyer 629, that is being used with a flow element such as Dwyer orifice plate Series OP or TE. The user-selectable, low-flow cut-off feature gives a reading of zero when the rate is below a user-selectable value.

PUMP CONTROL
With the two or four contact output option the APM can be used as a programmable pump controller when used with a Dwyer level transmitter. The unit also has programmable on and off points for up to four pumps, quadraplex pumping systems with alteration capability. When using the 4-relay model with the four external relay accessory, the APM can do 8 contacts for any combination of pump control and 8 programmable alarms.

SPECIFICATIONS
Input: 0 to 20 mA, 4 to 20 mA, 0 to 5V, or ±10V inputs; A 85-265 VAC or 12/24 VDC.
Input Impedance: 50 to 100 Ω.
Accuracy: ±0.03% of calibrated span ±1 count, square root & programmable exponent accuracy range: 10-100% of calibrated span.
Power Requirements: 85 to 265 VAC 50/60 Hz, 90 to 265 VDC, 20 W max or 12 to 24 VDC ±10%, 15 W max.
Display: Dual-line 6-digit display, 0.60 in and 0.46 in.
Decimal Points: Five positions, user selectable.
Temperature Limits:
- Operating: -40 to 149°F (-40 to 65°C);
- Storage: -40 to 185°F (-40 to 85°C).
Enclosure Rating: NEMA 4X, IP65 front.
Electrical Connections: Removable screw terminal blocks accept 12 to 22 AWG wire, RJ45 for external relays, digital I/O, and serial communication adapters.
Output Signal: 4 to 20 mA.
Power Supply:
- 85 to 265 VAC models: 200 mA @ 24 VDC;
- 12 to 24 VDC models: 100 mA @ 24 VDC;
- Second supply with output 2 models: 40 mA @ 24 VDC.
Switch Rating:
- 2 or 4 SPDT (Form C) internal and/or 4 SPST (Form A) external; rated 3A @ 30 VDC and 125/250 VAC resistive load; 1/14 HP @ 125/250 VAC for inductive loads.
Time Delay: 0 to 999.9 seconds, on & off relay time delays; programmable and independent for each relay.
Shipping Weight: 9.5 oz (269 g).
Agency Approvals: CE, RoHS, UL.
