The Series EVA Electric Actuators are designed to mount directly onto the Series GV globe valves, creating a complete, low cost, and compact control valve package. Floating or modulating control inputs are available, and the 24 VAC synchronous motor includes a magnetic clutch to protect the motor in stall conditions. Actuators are ruggedly constructed with a fire-proof ABS housing and robust aluminum bracket. Features include a visual position indicator and manual override to make this actuator an excellent choice for any size area, large or small.

**FEATURES**
- Manual override
- Compact size
- Floating control or selectable 0 to 10 VDC or 4 to 20 mA proportional control
- Reversible direction on proportional models
- Magnetic clutch protects motor in stall conditions
