The Series 641RM is the ideal instrument for monitoring air flow. This transmitter uses a heated mass flow sensor, which allows for precise velocity measurements at various flow rates and temperatures. The 641RM’s 16 field-selectable ranges from 0-50 to 15,000 FPM (0.1 to 75 MPS) provide the versatility to be selected for a multitude of applications. The unit’s 6’ cable which connects the sensing probe with the electronic enclosure allows the enclosure to be mounted where it can be more easily accessed. Longer cable lengths are available for ducts that are at very high elevations from the plant floor. The optional LED produces a complete, compact solution for local indication of air flow.

Model 641RM-12, Air Velocity Transmitter with 6’ cable ……………… $519.00
Model 641RM-12-LED, same as above with LED display ………………… $649.00

ACCESSORIES
A-156, Universal Mounting Plate, 1/2˝ female NPT ……………… $15.50
A-158, Split Flange Mounting Kit ………………………………………… $13.75
A-159, Dust Mounting Gland …………………………………………… $28.00
641-LED, Field-upgradable LED ………………………………………… $135.00

OPTION
For NIST traceable calibration certificate, add suffix -NIST to model numbers.
Example: 641RM-12-NIST ………………………………………………… $215.00
⑤ Items are net priced and are not subject to any discount.

The Series 641B Air Velocity Transmitter uses a heated mass flow sensor technology. It has 4 user-selectable ranges from 250 FPM to 2000 FPM with corresponding metric ranges of 1.25 MPS to 10 MPS. The 641B provides an isolated 4 to 20 mA output proportional to the velocity.

Model 641B-4, Air Velocity Transmitter …………………………………… $623.00

ACCESSORIES
A-156, Flange Mounting Plate with 1/2˝ female NPT ……………… $15.50
A-155, Mounting Gland with 1/2˝ male NPT fitting …………………… $15.25
④ A brief current transient exceeding 300 mA may be seen on startup

SPECIFICATIONS
Service: Air and compatible, non-combustible gases.
Accuracy: 3% FS process gas: 32 to 122°F (0 to 50°C); 4% FS process gas: -40 to 32°F & 122 to 212°F (-40 to 0°C & 50 to 100°C).
Response Time: Flow: 1.5 seconds to 95% of final value (output filter set to minimum).
Temperature Limits: Process: -40 to 212°F (-40 to 100°C); Ambient: 32 to 140°F (0 to 60°C).
Pressure Limit: 100 psi (6.89 bar) maximum.
Humidity Limit: Non-condensing.
Power Requirements: 12 to 35 VDC, 10 to 16 VAC. 1.5A rating required on 120 VAC supply due to initial power surge drawn by transmitter.
Output Signal: 4 to 20 mA, isolated 24V source, 3 or 4-wire connection.

OPTIONAL DISPLAY VERSION:
Display: 4-1/2 digit 1/2˝ red LED.
Resolution: 1 FPM, 0.01 MPS (10 FPM at 10.000 and 15,000 FPM ranges).
Weight: 13.9 oz (394.16 g).
