The Series 7116 Spirahelic® Pressure Indicating Transmitter provides both an ASME Grade 2A accuracy analog pressure gage for precise local indication and a 2-wire, 4-20 mA output signal for remote monitoring and control. Unique triple wound Bourdon tube movement drives pointer directly with no gears, cams or linkages which can wear and fail early. Stainless steel pressure connection block allows a choice of horizontal or vertical piping. Electrical connections, zero and span controls are located on rear.
