The Series 783 Electromechanical Ice Cube Relay is a full featured 3PDT relay that can control up to 3 devices with a single trigger. It features a flag status indicator and a LED status lamp to let the user know when the relay is activated. In order to differentiate between AC and DC actuated models, the push-to-test button is color-coded. For testing the operation, a removable lock-down lever holds the test button in place. The clear plastic housing gives a view of the contacts, and there is a removable ID tag for labeling the circuit. The Series 783 can handle loads up to 15 amps.

###SPECIFICATIONS
- Operating and Load Voltage Range: 24 VAC to 28 VDC.
- Electrical Rating: 15 A @ 120 VAC
- Electrical Connection: Silver alloy plug-in contacts.
- Switching Operation: 3PDT.
- Electrical Rating: 15 A @ 120 VAC
- Temperature Limits: Storage: -40°F to 185°F (-40°C to 85°C); Operation: -40°F to 131°F (-40°C to 55°C).
- Power Consumption: 1.5 VA; 1.4 W.
- Cycle Life: 200,000 cycles (electrical); 10,000,000 cycles (mechanical).
- Housing: Plastic polycarbonate.
- Weight: 2.1 oz (60 g).
- Agency Approvals: CE, CSA, RoHS, cUL, cUR, UR.

###ACCESSORIES
- 70-783D11-1A, Socket for 783 Series Relay
- 70-ASMM-120, Protection Modules, MOV Suppressor, 120 VAC/VDC
- 70-784D14-1, Socket for 784 Series Relay
- 70-ASMD-250, Protection Modules, Protection Diode, 6 to 250 VDC
- 16-750/788CBJ-1, Coil Bus Jumpers

Series 784 Electromechanical Ice Cube Relay

The Series 784 Electromechanical Ice Cube Relay is a full featured 4PDT relay that can be used to handle loads up to 15 amps for AC or DC circuits. Utilizing the same trigger, this relay can be used in underground parking garage applications to signal audible and visual alarms for high levels of carbon monoxide, while opening the dampers and starting the exhaust fans. It features a flag status indicator and a LED status lamp to let the user know when the relay is activated. In order to differentiate between AC and DC actuated models, the push-to-test button is color-coded. For testing the operation, a removable lock-down lever holds the test button in place. The clear plastic housing gives a view of the contacts and there is a removable ID tag for labeling the circuit.

###SPECIFICATIONS
- Operating and Load Voltage Range: 24 VAC to 28 VDC.
- Electrical Connection: Silver alloy plug-in contacts.
- Switching Operation: 4PDT.
- Electrical Rating: 15 A @ 120 VAC
- Temperature Limits: Storage: -40°F to 185°F (-40°C to 85°C); Operation: -40°F to 131°F (-40°C to 55°C).
- Power Consumption: 1.5 VA; 1.5 W.
- Cycle Life: 200,000 cycles (electrical); 10,000,000 cycles (mechanical).
- Housing: Plastic polycarbonate.
- Weight: 2.8 oz (80 g).
- Agency Approvals: CE, CSA, RoHS, cUL, cUR, UR.
