**Series 725 Power Relay**

30 Amp, SPDT and DPDT Operation

**The Series 725 Power Relays** are designed to switch high current loads in the most demanding of applications. By having a high dielectric strength from the coil to the contacts, the relay is able to withstand severe voltage surges and spikes as commonly seen in inductive loads. Flag and LED indicators show the relay status and if there is power to the coil. A push-to-test button allows for manual testing of the relay operation without providing an electrical trigger. Integral mounting ears allow the relay to be panel mounted or DIN rail mounted without the need for an external socket. For quicker wiring installation, the Series 725 is available with quick connect tabs or screw terminals.
