The Model ANE-1 Differential Pressure Anemometer is a robust and durable bi-directional anemometer with no moving parts or sensing electronics. With the installed tubing, the ANE-1 connects easily to any manometer or applicable pressure sensing device and is capable of measuring a wide velocity range. The air velocity range and accuracy is dependent on the installed manometer, and the ANE-1 retains the accuracy as long as it is dust free. The ANE-1 is made from high quality ABS plastic, comes with a convenient handle, and includes 5’ of blue and 5’ of red silicone tubing (2 mm ID x 4.5 mm OD) with removable adapter sized 2 mm OD to 3/16” OD that has two removable 5” clear silicone 3/36” ID x 3/8” OD tubing versatile process options.
