MOUNTING. A single case size is used for most models of Magnehelic® gages. They can be flush or surface mounted with standard hardware supplied. Complete mounting and connection fittings plus instructions are furnished with each instrument. A 4-9/16” hole is required for flush panel mounting.

Flush mounting is easily accomplished with the new A-300 Flush Mounting Bracket. This bracket provides a solution to quickly and conveniently flush mount the Magnehelic®. The A-300 is ideal for mounting the Magnehelic® on control panel doors.

The A-368 is a simple bracket for quickly surface mounting the Magnehelic® gage. After securing the Magnehelic® to the A-368 bracket, mount the bracket on any flat surface.

The A-369 allows the Magnehelic® to be easily carried to locations where pressure readings need to be taken. The A-369 can stand on its own or hang on a nail or hook.

### Specifications

- **Housing:** ABS.
- **Process Connections:** Anodized aluminum.
- **Enclosure Rating:** NEMA 1 (IP10).
- **Weight:**
  - Model A-320-A: 11.29 oz (320 g)
  - Model A-320-B: 16.23 oz (420 g)
- **Gage Size Opening:**
  - Model A-320-A: 4-9/16 in (115.89 mm)
  - Model A-320-B: 4-13/16 in (122.24 mm)
