TEST & DATA

The Model HP Hand Pump provides a dual source of pneumatic pressure and vacuum for verifying the calibration of pressure instrumentation. Pump can generate pressures up to 45 psig (3 bar) and vacuum to -27 in Hg (-910 mbar). The compact pump is designed for portability and single hand operation. Model HP features a pressure relief valve and fine adjustment for control better than 0.0015 psi (0.1 mbar). Pump includes two 39” (1 m) hoses terminating in 1/4” female NPT connections and instruction manual.

FEATURES/BENEFITS
• Offers vacuum or positive pressure sourcing
• Compact and portable
• Integral relief valve for fine adjustment
• Reference gage recommendation: DPG-022

APPLICATIONS
• Test instrument calibration
• Pressure switch calibration
• Pressure transmitter calibration

USA: California Proposition 65

WARNING: Cancer and Reproductive Harm - www.P65Warnings.ca.gov

The Series CHP Pneumatic Hand Pump is the most dependable and rugged pump for applications up to 100 psi or 28.8 in Hg vacuum. The durable Acetal plastic and anodized aluminum construction prevents body heat transfer, resulting in drift-free, accurate readings. The Series CHP is equipped with oversized check valves in order to provide smooth and controlled operation. Dual O-Rings on all pistons ensure the pump to be leak-free. The unit includes a 2” L hose, 1/8” female NPT gage fitting, and 1/8” NPT pipe plug. An optional hose kit is available so that a tee is not required when connecting a sensor and a calibrator. The Series CHP is ideal for checking calibration of pressure or vacuum gages, switches, or transmitters.

FEATURES/BENEFITS
• Offers vacuum or positive pressure sourcing
• Compact and portable
• Integral relief valve for fine adjustment
• Reference gage recommendation: DPG-022

APPLICATIONS
• Pressure transmitter calibration
• Pressure switch calibration
• Test instrument calibration

MODEL A-396A

The Model A-396A Calibration Pump serves as pressure source to calibrate gages and transmitters or to set pressure switches. Use with manometer or other pressure standard. Includes volume adjuster enabling fine pressure control and bleed valve. Generates pressures from a fraction of an in w.c. to 72 psig (5 bar). Includes barbed fitting, tee connector and three 36” lengths of vinyl tubing.

FEATURES/BENEFITS
• Offers wide pressure sourcing capability
• Compact and portable
• Integral relief valve for fine adjustment
• Reference gage recommendation: DPG-022

APPLICATIONS
• Test instrument calibration
• Pressure switch calibration
• Pressure transmitter calibration

MODEL A-350

The Model A-350 Aspirator Bulb can be used to source pressure for calibration and leak checking tests. Simply squeeze the bulb after the tubing is connected to generate pressure. For applications such as our CO2 indicator, the aspirator bulb can be squeezed before inserting the tubing to draw a vacuum to pull the smoke or air from a duct or stack into the gage.

FEATURES/BENEFITS
• Offers vacuum or positive pressure sourcing
• Compact and portable
• Most cost effective option
• Reference gage recommendation: Magnehelic 2010

APPLICATIONS
• Test instrument calibration
• Pressure switch calibration
• Pressure transmitter calibration
• Smoke leak testing
