The Series BBV-0 2-Valve Block Manifold is perfect for use over a broad range of industrial applications including oil refineries, nuclear power stations, petrochemical processing, and more. The Series BBV0 is forged from 316 stainless steel bar stock and designed to withstand repeated open and close operations. Suited to control oil, water, toxic fluids, chemicals, air, and steam; the 2-valve block manifold has (1) isolate and (1) vent valves. Each valve stem is precision machined with hard seats to reduce operating torque.

The BBV0F and BBV0N are designed to mount directly to industrial pressure transmitters. The BBV0F comes with two 7/16-20 UNF mounting bolts and one PTFE gasket.

## SPECIFICATIONS

**Service:** Compatible liquids, gases, or steam.

**End Connections:**
- Process connection: 1/2” female NPT;
- Instrument connection:
  - No flange: 1/2” male NPT;
  - Flange: 1/2” DIN 19213 flange;
  - Vent/test: 1/4” female NPT.

**Wetted Materials:**
- Body, stem, valve assembly: 316 SS;
- Stem packing: PTFE.

**Pressure Limit:** 8000 psi (400 bar).

**Temperature Limit:** 464°F (240°C).

**Other Materials:** Handle: 304 SS.
