**FLOW & LEVEL MONITORING**

**FLOW MONITORING**

**SERIES SFL-1P** - AIR-VENT DRY TRANSITER

- Suitable for installations where water flow needs to be monitored.

**SERIES SVF-2** - VANE FLOW SENSOR

- Ideal for applications requiring air and gas flow measurement.

**SERIES SVF-S2** - ULTRASONIC ENERGY METER

- Equipped with field adjustable vane layers for precise tuning.

- Features an aluminum weatherproof housing for outdoor installation.

**LEVEL MONITORING**

**SERIES S24** - LIQUID LEVEL SWITCH

- Designed for applications requiring liquid level detection.

**SERIES SLG** - LIQUID LEVEL SENSORS

- Suitable for use in various industries requiring liquid level monitoring.

**SERIES S-26** - WATER LEAK DETECTOR

- Monitors water leaks with audible and visual alerts.

**SERIES SL-2** - BOILER WATER LEVEL CONTROLS

- Capable of controlling the water level in a boiler with high reliability.

**BOILER**

**FLOW MONITORING**

**SERIES SFL-1P** - AIR-VENT DRY TRANSITER

- Monitors the flow of air or other dry materials.

**SERIES SVF-2** - VANE FLOW SENSOR

- Adjustable vane layers allow for custom set points for boiler flow monitoring.

**SERIES SVF-S2** - ULTRASONIC ENERGY METER

- Offers an aluminum weatherproof housing ideal for outdoor installation.

**LEVEL MONITORING**

**SERIES S24** - LIQUID LEVEL SWITCH

- Suitable for water level detection in boilers.

**SERIES SLG** - LIQUID LEVEL SENSORS

- Designed for water level monitoring in boilers.

**SERIES SL-2** - BOILER WATER LEVEL CONTROLS

- Features a magnetic, mechanical internal design with high reliability and mercury-free operation.

**FLOW & LEVEL MONITORING**

**FLOW MONITORING**

**SERIES SFL-1P** - AIR-VENT DRY TRANSITER

- Monitors the flow of air or other dry materials.

**SERIES SVF-2** - VANE FLOW SENSOR

- Adjustable vane layers allow for custom set points for boiler flow monitoring.

**SERIES SVF-S2** - ULTRASONIC ENERGY METER

- Offers an aluminum weatherproof housing ideal for outdoor installation.

**LEVEL MONITORING**

**SERIES S24** - LIQUID LEVEL SWITCH

- Suitable for water level detection in boilers.

**SERIES SLG** - LIQUID LEVEL SENSORS

- Designed for water level monitoring in boilers.

**SERIES SL-2** - BOILER WATER LEVEL CONTROLS

- Features a magnetic, mechanical internal design with high reliability and mercury-free operation.

**FLOW & LEVEL MONITORING**

**FLOW MONITORING**

**SERIES SFL-1P** - AIR-VENT DRY TRANSITER

- Monitors the flow of air or other dry materials.

**SERIES SVF-2** - VANE FLOW SENSOR

- Adjustable vane layers allow for custom set points for boiler flow monitoring.

**SERIES SVF-S2** - ULTRASONIC ENERGY METER

- Offers an aluminum weatherproof housing ideal for outdoor installation.

**LEVEL MONITORING**

**SERIES S24** - LIQUID LEVEL SWITCH

- Suitable for water level detection in boilers.

**SERIES SLG** - LIQUID LEVEL SENSORS

- Designed for water level monitoring in boilers.

**SERIES SL-2** - BOILER WATER LEVEL CONTROLS

- Features a magnetic, mechanical internal design with high reliability and mercury-free operation.

**FLOW & LEVEL MONITORING**

**FLOW MONITORING**

**SERIES SFL-1P** - AIR-VENT DRY TRANSITER

- Monitors the flow of air or other dry materials.

**SERIES SVF-2** - VANE FLOW SENSOR

- Adjustable vane layers allow for custom set points for boiler flow monitoring.

**SERIES SVF-S2** - ULTRASONIC ENERGY METER

- Offers an aluminum weatherproof housing ideal for outdoor installation.

**LEVEL MONITORING**

**SERIES S24** - LIQUID LEVEL SWITCH

- Suitable for water level detection in boilers.

**SERIES SLG** - LIQUID LEVEL SENSORS

- Designed for water level monitoring in boilers.

**SERIES SL-2** - BOILER WATER LEVEL CONTROLS

- Features a magnetic, mechanical internal design with high reliability and mercury-free operation.

**FLOW & LEVEL MONITORING**

**FLOW MONITORING**

**SERIES SFL-1P** - AIR-VENT DRY TRANSITER

- Monitors the flow of air or other dry materials.

**SERIES SVF-2** - VANE FLOW SENSOR

- Adjustable vane layers allow for custom set points for boiler flow monitoring.

**SERIES SVF-S2** - ULTRASONIC ENERGY METER

- Offers an aluminum weatherproof housing ideal for outdoor installation.

**LEVEL MONITORING**

**SERIES S24** - LIQUID LEVEL SWITCH

- Suitable for water level detection in boilers.

**SERIES SLG** - LIQUID LEVEL SENSORS

- Designed for water level monitoring in boilers.

**SERIES SL-2** - BOILER WATER LEVEL CONTROLS

- Features a magnetic, mechanical internal design with high reliability and mercury-free operation.

**FLOW & LEVEL MONITORING**

**FLOW MONITORING**

**SERIES SFL-1P** - AIR-VENT DRY TRANSITER

- Monitors the flow of air or other dry materials.

**SERIES SVF-2** - VANE FLOW SENSOR

- Adjustable vane layers allow for custom set points for boiler flow monitoring.

**SERIES SVF-S2** - ULTRASONIC ENERGY METER

- Offers an aluminum weatherproof housing ideal for outdoor installation.

**LEVEL MONITORING**

**SERIES S24** - LIQUID LEVEL SWITCH

- Suitable for water level detection in boilers.

**SERIES SLG** - LIQUID LEVEL SENSORS

- Designed for water level monitoring in boilers.

**SERIES SL-2** - BOILER WATER LEVEL CONTROLS

- Features a magnetic, mechanical internal design with high reliability and mercury-free operation.

**FLOW & LEVEL MONITORING**

**FLOW MONITORING**

**SERIES SFL-1P** - AIR-VENT DRY TRANSITER

- Monitors the flow of air or other dry materials.

**SERIES SVF-2** - VANE FLOW SENSOR

- Adjustable vane layers allow for custom set points for boiler flow monitoring.

**SERIES SVF-S2** - ULTRASONIC ENERGY METER

- Offers an aluminum weatherproof housing ideal for outdoor installation.

**LEVEL MONITORING**

**SERIES S24** - LIQUID LEVEL SWITCH

- Suitable for water level detection in boilers.

**SERIES SLG** - LIQUID LEVEL SENSORS

- Designed for water level monitoring in boilers.

**SERIES SL-2** - BOILER WATER LEVEL CONTROLS

- Features a magnetic, mechanical internal design with high reliability and mercury-free operation.

**FLOW & LEVEL MONITORING**

**FLOW MONITORING**

**SERIES SFL-1P** - AIR-VENT DRY TRANSITER

- Monitors the flow of air or other dry materials.

**SERIES SVF-2** - VANE FLOW SENSOR

- Adjustable vane layers allow for custom set points for boiler flow monitoring.

**SERIES SVF-S2** - ULTRASONIC ENERGY METER

- Offers an aluminum weatherproof housing ideal for outdoor installation.
