BC-CAL

QUICK TURNAROUND TIME
Our instrumentation is typically calibrated and shipped within 5 business days.

ACCREDITED CALIBRATIONS
ISO/IEC 17025:2017
ANSI/NCSL Z540-1-1994
ANSI/NCSL Z540.3-2006

REPAIR SERVICES
Trust us to repair your Dwyer instrument with its original parts and high standard of quality.

HISTORY IN THE MAKING
For the first time in the history of Dwyer Instruments, Inc., the Engineering Laboratory located at the headquarters facility in Michigan City, IN formed a Management Team that gained accreditation to ISO/IEC 17025:2017, ANSI/NCSL Z540-1 and ANSI/NCSL Z540.3 Section 5.3 through ANAB: ANSI National Accredited Board for Calibration.

WHY IS ACCREDITATION IMPORTANT?
Laboratories that are Accredited to not only ISO/IEC 17025:2017 but also ANSI/NCSL Z540-1 and ANSI/NCSL Z540.3 benefit from:
• International recognition
• Access to a global marketplace and business opportunities
• Cost savings
• Increased customer confidence
• Enhanced laboratory capabilities
• Sound management system
• Reduced waste
• Gained trust from customers

Dwyer's dedication to quality is unmatched in the industry. We go above and beyond to provide impeccable service, paired with quality calibrations. We understand that being without your instrument can cost you money and are committed to getting your instrument back to you as quickly as possible. You'll be able to rest easy knowing the quality, accuracy, support, and dependability will match the day you purchased your instrument.

This newly expanded scope allows us to offer new products to you as well as show our dedication and commitment to quality and are now also able to offer electrical measurement capabilities that include DC Voltage - Source & Measure, DC Current - Source & Measure, and Temperature Measurement.

The Dwyer Instruments, Inc. Engineering Laboratory is proud to share that it has expanded its scope of accreditation (which contains additional data that satisfies requirements of military QMS’s).

A Regional Accredited Laboratory is an entity that the ISO/IEC 17025 Management Team takes pride in our ISO/IEC 17025 Accredited Calibration Laboratory. As the laboratory is located in our headquarters facility, it serves as the primary gateway standard for the rest of the company to follow with regard to not only its dedication to quality but measurement uncertainty as well. Whether the Accredited Calibration Laboratory is working on expanding the scope of accreditation, new measurement techniques, or routine daily production work, it is an entity that the rest of our company and our customers can trust that we are doing all we can to improve the quality of measurement.

WHY CHOOSE ACCREDITED CALIBRATIONS FROM Dwyer Instruments, Inc.?

- Personal service within the ISO/IEC 17025 Accredited Calibration Laboratory by years of experience in implementing and maintaining an improvement and management laboratory system that is dedicated to providing quality our customers can trust.
- By purchasing services provided by the Accredited Calibration Laboratory, customers have access to a management team that can provide feedback to the customer with regard to reliability and quality systems.
- We are here to better serve the customer and improve their experience with Dwyer accredited calibrations. By choosing Dwyer Instruments, you can customize the service for each type of instrument sent in for accredited calibration that better satisfies your requirements and your instruments end environment.

CALIBRATION SERVICE OPTIONS

**FACTORY CALIBRATION CERTIFICATE**
A “bare-minimum” certificate that includes a few test points recorded with data for performance of the device at the time of manufacture.

**NIST Traceable**
As-Found and As-Left Data Provided
Detailed Uncertainties Provided
Noted on Certificate
Greater than 4:1 Test Uncertainty Ratio (with Exceptions Noted on Certificate)

**ISO/IEC 17025 ACCREDITED CERTIFICATE OF CALIBRATION WITH MEASUREMENT UNCERTAINTIES**
An “expanded” certificate that includes an expanded uncertainty for each test point with data for performance of the device at the time of manufacture.

**ISO/IEC 17025 ACCREDITED CERTIFICATE OF CALIBRATION WITH MEASUREMENT UNCERTAINTIES, TEST UNCERTAINTY GUARD BANDING OF TOLERANCES**
An “expanded” certificate that includes an expanded uncertainty for each test point with data for performance of the device at the time of manufacture. In addition, the uncertainties are expanded by a factor of 4.

**FACTORY CALIBRATION CERTIFICATE**
A “bare-minimum” certificate that includes a few test points recorded with data for performance of the device at the time of manufacture.

The Dwyer Instruments, Inc. Engineering Laboratory is proud to share that it has expanded its scope of accreditation (which enables us to offer new products to you as well as show our dedication and commitment to quality and measurement science). Whether the Accredited Calibration Laboratory is working on expanding the scope of accreditation, new measurement techniques, or routine daily production work, it is an entity that the company can trust. Our customers can trust that we are doing everything we can to improve the quality of measurement. Dwyer Instruments provides.

WHY CHOOSE ACCREDITED CALIBRATIONS FROM DWYER INSTRUMENTS, INC.?

• Personnel operating within the ISO/IEC 17025 Accredited Calibration Laboratory have years of experience in implementation, maintaining and improving a management and laboratory system that is dedicated to providing quality our customers can trust.

• By purchasing services provided by the Accredited Calibration Laboratory, customers have access to a management team that can provide feedback to the customer with regard to metrology or quality systems.

• We are here to serve our customer and improve their experience with ISO/IEC accredited calibrations. By choosing Dwyer Instruments, you can customize the service for each type of instrument sent in for accredited calibration that better satisfiers your requirements and your instruments environment.
