The Model CDSN Carbon Dioxide Transmitter accurately monitors the CO₂ concentration and temperature in schools, office buildings, and other indoor environments to help achieve LEED® certification and energy savings. In order to achieve a higher level of accuracy, the Model CDSN includes digital barometric pressure adjustment. The CO₂ universal output allows users to select the transmitter output to be 4-20 mA, 0-5 VDC, or 0-10 VDC to work with virtually any building management controller. In addition, the housing security feature reduces the likelihood of physical tampering.

**BENEFITS/FEATURES**
- Minimize inventory and save time by combining CO₂ and temperature measurement, as well as DIP switch selectable current/voltage outputs
- Integral passive temperature reduces the number of devices mounted in the space
- Requires minimal maintenance with Automatic Baseline Correction (ABC) to account for sensor drift
- Reduce operation costs using a low energy, reliable, and repeatable CO₂ sensor
- Simplify installation with backplate electrical connections

**APPLICATIONS**
- Demand control ventilation in schools
- Indoor air quality monitoring in office buildings
