**TUNING FORK LEVEL SWITCH**
Perfect for Sensing Low Bulk Density or Low Dielectric Materials

The **SERIES TFLS** Tuning Fork Level Switches is ideal for level control of powders and free-grained solids, especially those with a low bulk density. The TFLS incorporates a piezoelectric crystal that vibrates the fork at its natural frequency, when contact material is present it dampens the vibrations and the switch changes state.

**FEATURES/BENEFITS**
- Status indication with external LED switch indicator, and internal indicators for normal and alarm status
- No calibration required for quick and easy installation
- No mechanical moving parts with no routine maintenance required
- Unaffected by the dielectric constant of the sensed material, making it superior to a capacitance level switch for applications where the dielectric constant is too low, where there is more than one material being used in one vessel, and when material moisture content can change
- Vibrating fork design is ideal for low bulk density and low dielectric constant products, detecting products down to 1.8 lb/ft³ (30 g/l)
- Adjustable sensitivity can be set to ignore lighter bulk density products and only detect heavier products, such as sand, gravel, or polyester chips in water
- Unit is not affected by vibration from conveying systems, motors, or the movement of material
- Mounted in any position and is available with factory built extensions for mounting on the top of the storage vessel
- Fail safe setting with output switch that can be set for NO or NC condition on loss of power
- Time delay prevents false alarms from material surges
- Universal power supply yields one model which works with 90 to 265 VAC and 24 VDC

**APPLICATIONS**
- Chemical processing
- Pulp and paper processing
- Mining
- Food and beverage
- Lime, styrofoam, tobacco, dry cereals, sugar, animal feed, milk powder, flour, insulation, cement, paper shavings, plastic granules, sawdust, carbon black, light fibers, detergent powders, dyes, chalk, silica, sand, wood chips

**MINI TUNING FORK LEVEL SWITCH**
Compact, Cost Effective, DIN Connection

The **MODEL CTF** Mini Tuning Fork Level Switches is an ideal choice for level control of powders. The CTF incorporates a piezoelectric crystal that vibrates the fork at its natural frequency, when contact material is present it dampens the vibrations and the switch changes state. This series offers a PNP/NPN configurable output.

**FEATURES/BENEFITS**
- DIN connection and compact size allows for application in places a larger tuning fork level switch may not be suitable, providing great versatility
- No mechanical moving parts with no routine maintenance required
- Unaffected by the dielectric constant of the sensed material, making it superior to a capacitance level switch for applications where the dielectric constant is too low, where there is more than one material being used in one vessel, and when material moisture content can change
- Ideal for applications where the bulk density is too low for a rotating paddle level switch

**APPLICATIONS**
- Chemical processing
- Pulp and paper processing
- Mining
- Food and beverage
- Lime, styrofoam, tobacco, dry cereals, sugar, animal feed, milk powder, flour, insulation, cement, paper shavings, plastic granules, sawdust, carbon black, light fibers, detergent powders, dyes, chalk, silica, sand, wood chips

**SPECIFICATIONS**
- Service: Dry powder compatible with wetted materials.
- Wetted Materials: Tuning Fork: 316 SS; Process connection: 304 SS.
- Temperature Limits: Ambient: -4 to 140°F (-20 to 60°C); Process: -4 to 176°F (-20 to 80°C).
- Pressure Limit: 145 psig (10 bar).
- Power Requirement: 90 to 265 VAC, 50/60 Hz; 24 VDC.
- Power Consumption: 4 VA.
- Enclosure: Aluminum, painted.
- Switch Type: SPDT.
- Electrical Rating: 5 A @ 230 VAC.
- Electric Connections: Screw terminals.
- Conduit Connection: 3/4” female NPT.
- Process Connection: 1-1/2” male NPT.
- Sensing Delay: Contact factory for fork extension options in carbon steel or stainless steel.
- Time Delay: Contact factory for fork extension options in carbon steel or stainless steel.

**MINI TUNING FORK LEVEL SWITCH**
Compact, Cost Effective, DIN Connection

**SPECIFICATIONS**
- Service: Dry powder compatible with wetted materials.
- Wetted Materials: Tuning Fork: 316 SS; Process connection: 304 SS.
- Temperature Limits: Ambient: -4 to 140°F (-20 to 60°C); Process: -4 to 176°F (-20 to 80°C).
- Pressure Limit: 145 psig (10 bar).
- Power Requirement: 90 to 265 VAC, 50/60 Hz; 24 VDC.
- Power Consumption: 4 VA.
- Enclosure: Aluminum, painted.
- Switch Type: 3-wire PNP/NPN output.
- Electrical Rating: 350 mA (max) @ 12 to 55 VDC.
- Conduit Connection: Valve plug DIN 43650.
- Process Connections: 1” male NPT.
- Indication Lights: External red LED, Internal: Green and red LED’s.
- Sensing Delay: Contact factory for fork extension options in carbon steel or stainless steel.
- Time Delay: Contact factory for fork extension options in carbon steel or stainless steel.
