The Series DL2 accurately records pressure and gives instant remote readings. The large, backlit LCD and 8-button keypad provide convenient access to current data and recorder setup as well as memory and battery levels. The Series DL2 can be ordered for absolute or gauge pressure measurements up to 5,000 psi. Using the keypad or software, measurements can be read in psi, in. Hg, mm Hg, bar, atm, Torr, Pa, kPa, or MPa. The large memory capacity allows over 260,000 readings to be stored. The easy-to-use DL700 software makes creating permanent records, performing data calculations, and graphing of data simple. The DL2 can easily be started and stopped from a PC or delayed to start up to six months in advance. It can also stop recording at a specific time or after a certain number of readings have been taken.

### Series DLP

The Series DLP pressure data logger can record pressure and temperature. The 1/4˝ NPT fitting comes standard and allows the logger to be adapted to almost any pressure fitting. The internal temperature sensor provides accurate temperature measurements without the need of a separate temperature recorder, and many of the models provide a choice between measuring pressure in PSIA or PSIG. The DLP can easily be started and stopped from a PC or delayed to start up to six months in advance. The battery-powered data logger can store over 16,000 measurements per channel, and the easy-to-use DL700 software makes retrieving data simple.
