**Series DTP**

**Dip Tape Level Indicator Plastic**

Customizable, Lightweight, No Electricity Needed

---

**PRINCIPLE OF OPERATION**

The Series DTP is a manual, no electricity required indicator that is compact, providing uninterrupted liquid level indication for use in storage tanks or vessels. With a sturdy, lightweight design, the DTP is ideal for 30 or 55 gallon tanks. Stem and mounting fixtures are available in PVC, PVDF, or polypropylene. With a choice of three highly resistant, engineered plastic materials, and large floats, the DTP provides rugged durability in almost any chemical or saltwater application. A custom configurable DTP is available in lengths ranging from 6 in (15.2 cm) up to 6 ft (182.9 cm). This level indicator is ideal for quick readouts taken periodically. The DTP is accurate to 1/16 in or 1 mm, and is especially useful in remote areas where power is unavailable, or undesirable.
