

STATEMENT ON GALLIUM AND GERMANIUM

September 15, 2023

Dear Partner,

As you may be aware, the Chinese Ministry of Commerce (MOFCOM) issued a press release on July 3, 2023, introducing new export controls on metal Gallium and Germanium and its related compounds. These materials are of critical importance in the semiconductor manufacturing sector.

Effective August 1, 2023, Chinese exporters of Gallium and Germanium are required to obtain an export license before shipping these materials internationally.

DwyerOmega is committed to ensuring that the products that DwyerOmega designs, manufactures, assembles, and supplies, either: a) do not contain Gallium or Germanium or b) do not have supply chain issues related to these export restrictions.

We have provided this information to the best of our knowledge and assessment. This statement is based on information and data which DwyerOmega and its partners consider reliable. If there are any changes related to this statement, it will be updated and published on:
