The Series IEF Insertion Electromagnetic Flow Transmitter is an adjustable insertion flowmeter featuring electromagnetic technology that accurately and reliably measures fluid velocity in addition to providing several continuous signal outputs. This series is specifically designed to offer superior performance paired with simple installation and use. One unit is adjustable to fit pipe sizes from 4 to 36˝ (102 to 914 mm), and offers several output options including selectable BACnet MS/TP or Modbus® RTU communications protocol over 2-wire RS-485 in addition to the standard analog, frequency and alarm outputs.

**FEATURES/BENEFITS**
- Field configurable setup displays (-LCD integral option or remote accessory A-IEF-DSP) allow for ultimate flexibility by accommodating a variety of application configurations with one model through multiple display configurations i.e. pipe size, pipe material, liquid type, analog output, pulse/frequency output, alarm outputs, communication outputs, damping, and calibration factor.
- High performance accuracy is maintained through changes in temperature, density or viscosity.
- Setup Wizard and installation tool are simple to use for allowing for quick and precise installation.
- Accessory setup kit A-IEF-KIT ensures exact installation application depth with included thickness gage and measuring tape.
- Long Life Cycle and minimal maintenance requirements with no moving parts to wear or break and electrodes that discourage fouling.
- Isolation valve accessory options allow for installation in operational systems via hot-tap kit or easy removal without system downtime.
- NIST traceable pass/fail verification certificate included standard for Carbon Steel Schedule 40 pipes sized 4˝ (102 mm), 6˝ (150 mm), 8˝ (200 mm), and 10˝ (250 mm) with high accuracy option; 10˝ (250 mm) with standard option.

**APPLICATIONS**
- Boiler feed water
- Chilled water
- Open and closed loop condenser water
- Irrigation system
- Municipal water distribution
- Process and coolant flow
- Ground water remediation
- Chemical processing
- Pump protection
- Wastewater
- Mining

**SPECIFICATIONS**

**Service:** Compatible clean or dirty non-conductive liquids.

**Range:** 0 to 20 ft/s (0 to 6 m/s).*

**Wetted Materials:** Body shaft/fitting: 316 SS; Electrodes: 316 SS; Electrode cap: Polymer/Polyethylene; O-ring: Silicon.

**Accuracy:** High accuracy units ±0.5% of reading at calibrated velocity; ±1% of reading from 2 to 20 ft/s (0.6 to 6 m/s); ±0.02% ±0.006 m/s at x 2 ft/s (0.6 m/s); Standard accuracy units ±1% FS.

**Temperature Limits:** Ambient: -20 to 160°F (-29 to 71°C); Process: 15 to 250°F (-9 to 121°C); Storage: -40 to 185°F (-40 to 85°C).

**Process Connection:** 1˝ NPT or BSPT with accessory full port ball valve options.

**Power Requirements:**
- (1) Analog: 4-20 mA, 0-5 V, 0-10 V or (display selectable).
- (1) Pulse/Frequency: 0 to 15 V peak pulse, 0 to 500 Hz or scalable pulse output (display selectable).
- (2) Alarm; (1) Empty pipe detection or minimum/maximum velocity, (display selectable); (1) Reverse flow output indication.

**Pressure Limits:**
- Standard accuracy units: ±1% FS.
- High pressure units: ±1% of reading from 0 to 20 ft/s (0 to 6 m/s).*

**Pressure Drop:**
- 0 to 20 ft/s (0 to 6 m/s).* for max flowrates >10 ft/s (3 m/s) order option -CC.
- 0 to 20 ft/s (0 to 6 m/s).* at < 2 ft/s (0.6 m/s); ±0.02 ft/s (±0.006 m/s) calibrated velocity; ±1% of reading from 2 to 20 ft/s (0.6 to 6 m/s); ±0.02% ±0.006 m/s at x 2 ft/s (0.6 m/s); Standard accuracy units ±1% FS.

**Conductivity:** >20 microsiemens.

**Electrical Connection:** Removable terminal blocks, model selectable 1/2˝ female NPT conduit connection, PG 16 gland or PG 16 gland with (2) 10 ft (3 m) 9 conductor 22 AWG plenum rated cables, accessory cable lengths up to 200 ft (61 m) optional.

**Display:** -LCD option; 2˝ (5.08 cm) x 2˝ (5.08 cm) graphic LCD with backlight.

**Communication (-COM OPTION)**

**Type:** BACnet MS/TP or Modbus® RTU communication protocol (default disabled, display selectable).

**Supported Baud Rates:** 9600, 19200, 38400, 57600, 76800, or 115200 bps (display selectable).

**Device Load:** 18 bit load.

**ADDITIONAL SPECIFICATIONS**

**Applicable Pipe Material:** Most popular plastics and metal pipes; i.e. Carbon steel, SS, copper, UPVC/PVDF, galvanized steel, mild steel, and brass.*

**Applicable Pipe Size:** 4-36˝ (101 to 914 mm), model dependent. See model chart. Diameter Length Requirements: >10 upstream; >5 downstream.

**Glycol:** 0 to 100% display selectable.

**Brass fittings and pipe are not to be used with NSF Certified models.**
