LOW PRESSURE CALIBRATION PUMP
High Resolution for Calibrating Low Pressure Gages and Transmitters

The **MODEL LPCP Low Pressure Calibration Pump** is a low air pressure source with the ability to easily adjust and stabilize. It is made up of quick connectors for fast instrument connect and disconnect.

**FEATURES/BENEFITS**
- Heat insulator between the cover and pressure chamber lessens the heat effect during micro-pressure calibration
- Highly stable adjustment

**APPLICATIONS**
- Instrument calibration
- Laboratories
- Production areas

**SERIES BCHP**
LOW PRESSURE CALIBRATION PUMP
Vacuum or Pressure, Generates up to 870 psi (60 bar)

The **Series BCHP Low Pressure Calibration Pump** is able to generate pressure and vacuum for adjusting or calibrating pressure gages, transmitters, or switches. The pump is hand operated and has a pneumatic pressure range of -28 to 870 psi (-0.95 to 60 bar).

**FEATURES/BENEFITS**
- Dual pressure ports for ease of use
- Fine adjustment valve ensures precise measurements

**APPLICATIONS**
- Instrument calibration
- Laboratories
- Production areas
