Mini View-Rite Level Indicator
Customized, Visual Level Indication, Compact Size

Miniature custom level indicators are ideal for high-visibility level indication in tight spaces. All SS housing provides rugged durability with a diameter of only 1-1/4˝ (32 mm). Select the mounting type that will best fit your application and an indication length of up to 96˝ (244 cm). View-Rite level indicators incorporate a pressure tight housing with internal float that magnetically activates external level indication flags, switches, or transmitter.

**SPECIFICATIONS**

- **Service:** Clean, low-viscosity liquids.
- **Pressure Limits:** ≤ 300°F, 400 psi (27.6 bar); ≥ 300°F, 373 psi (25.7 bar).
- **Tube Diameter:** 1-1/4˝ (32 mm).

**OPTIONAL SWITCH MODULES**

- MVR-S1, Maximum temperature is 300°F (148.9°C). Polysulfone with 1/4˝ female NPT conduit connection.
- MVR-S2, Maximum temperature is 750°F (399°C). 316 SS with 1/2˝ male NPT conduit connection.
- MVR-S3, Maximum temperature is 750°F (399°C). Explosion-proof terminal box with 1/2˝ female NPT conduit connection.
