Differential Pressure Gages

**Magnehelic® Gage Options**

**LED Setpoint Indicator**
- Bright red LED on right scale shows when setpoint is reached. Field adjustable from gage face, unit operates on 12-24 VDC. Setpoint indicator option comes with medium pressure (MP) bezel.
- Note: 4-13/16" hole for flush mounting.
- To order add suffix -SP

$163.00

**Adjustable Signal Flag**
- Integral with plastic gage cover. Available for most models except those with medium or high pressure construction. Can be ordered with gage or separate.
- To order add suffix -ASF

$10.00

**Transparent Overlays**
- Furnished in red, yellow, or green to highlight and emphasize critical pressures.
- To order add suffix -R (Red) $20.00
- To order add suffix -Y (Yellow) $20.00
- To order add suffix -G (Green) $20.00

**Mirrored Scale Overlay**
- A Mirrored Scale Overlay is also available to assist in reducing parallax error.
- To order add suffix -M $20.00

**MODELS FOR HIGH STATE PRESSURE APPLICATIONS**

**Medium Pressure Option:** for pressures to 35 psig.
- To order add suffix -MP $60.00

**High Pressure Option:** for pressures to 80 psig.
- To order add suffix -HP $119.00

**OPTIONAL BEZELS**

**Stainless Steel Bezel Option:**
- 304 Stainless Steel Electro polished Ra 16 finished bezel for the Magnehelic® is now available.
- To order add suffix -SB $45.25

**Chrome Bezel Option:**
- A Chrome Plated Aluminum Bezel is now available on the Magnehelic® gage for an aesthetically pleasing finish when mounting on metal surfaces such as control panels.
- To order add suffix -CB $22.50

**OPTIONS**

- LT, Low Temperatures to -20°F (-28°C) add $10.00
- NIST, NIST traceable calibration certificate $90.00
- FC, factory calibration certificate $30.00

① Items are net priced and are not subject to any discount.
MOUNTING. A single case size is used for most models of Magnehelic® gages. They can be flush or surface mounted with standard hardware supplied. Complete mounting and connection fittings plus instructions are furnished with each instrument. A 4-9/16” hole is required for flush panel mounting. Flush mounting is easily accomplished with the new A-300 Flush Mounting bracket. This bracket provides a solution to quickly and conveniently flush mount the Magnehelic®. The A-300 is ideal for mounting the Magnehelic® on control panel doors.

The A-368 is a simple bracket for quickly surface mounting the Magnehelic® gage. After securing the Magnehelic® to the A-368 bracket, mount the bracket on any flat surface. The A-369 allows the Magnehelic® to be easily carried to locations where pressure readings need to be taken. The A-369 can stand on its own or hang on a nail or hook.
