Reliable and convenient, the Series 1996 Gas Pressure Switch serves as a compact, low cost switch for gas fired furnaces and equipment. Pressure ranges for both models are ideal for high or low pressure interlock. Visible set point and on-off indicators add convenience in servicing. Use either NO or NC contacts on SPDT switch. Bottom connection has both 1/8" female and 1/4" male threads for pipe nipple or coupling. Top connection vents diaphragm chamber to outside or to furnace combustion chamber. Mount switch with diaphragm in a horizontal position and gas pressure connection at bottom. Used with natural, manufactured or LP gas.

**FEATURES/BENEFITS**

- Visible set point and on-off indicator simplifies operation and trouble shooting
- Compact size and low cost make it ideal for gas fired or gas equipment OEM applications
- Natural, manufactured or LP gas applications

**APPLICATIONS**

- Gas furnaces
- Natural, manufactured or LP gas applications

**SERIES PG | MERCOID® BY DWYER**

**GAS PRESSURE/DIFFERENTIAL PRESSURE SWITCHES**

External Adjustment, Visible Dial, Hermetically Sealed Snap or Mercury Switch

The Series PG Gas Pressure/Differential Pressure Switch has a large sensitive diaphragm and a reliable time proven mechanical design. For use with air and other compatible gases, they feature excellent ±1% of full-scale repeatability, easy to-read scale and convenient external set point adjustment. Application flexibility is afforded by a large variety of switching options including SPST, SPDT, DPST and DPDT; opening or closing on increasing pressure, vacuum or differential. PR and PRL models add manual reset operation on increasing or decreasing pressure. Mercury switches or hermetically sealed snap switches are available where high humidity would be a problem. If vibration or other factors preclude the use of mercury, snap switches can be provided. Standard housing is NEMA 1. Optional enclosures can be supplied for weather resistant and explosion-proof requirements.

**FEATURES/BENEFITS**

- Clear easy-to-read scale and external set point adjustment simplifies operation and trouble shooting
- Large diaphragm provides accuracy for precise control
- Multiple switching options meet the design of applications

**APPLICATIONS**

- Natural, manufactured or LP gas applications

**SPECIFICATIONS**

- Temperature Limits: -10 to 85°F (-23 to 28°C).
- Pressure Limit: Single pressure use on high side: Sustained pressure: 15 psig (1.0 bar); Surge limit: 20 psig (1.4 bar). Differential pressure use, Sustained pressure, range P1: 2 psig (0.14 bar); Sustained pressure, range P2: 10 psig (0.7 bar).
- Enclosure Rating: General purpose. Weatherproof and explosion-proof optional. 
- Repeatability: ±1% of full range.
- Switch Type: SPST mercury switch, SPDT mercury switch, SPDT snap switch, or SPDT hermetically sealed snap switch. Optional DPST.

**Electrical Rating:**

- SPDT mercury: 6A @ 120 VAC/VDC, 3A @ 240 VAC/VDC.
- SPDT mercury: 6A @ 240 VAC/VDC, 3A @ 120 VAC/VDC, 1/2 hp @ 120 VAC, 1/4 hp @ 240 VAC.
- SPDT mercury: 6A @ 240 VDC, 3A @ 120 VDC.
- SPDT mercury: 6A @ 240 VDC, 3A @ 120 VDC.
- SPDT mercury: 6A @ 240 VDC, 3A @ 120 VDC.
- SPDT mercury: 6A @ 240 VDC, 3A @ 120 VDC.

**SERIES 1996 GAS PRESSURE SWITCH**

Compact, Low Cost, 1.4 to 20 in w.c. Range

For open on increase of pressure replace 3 in middle of model number with 2. Example: PG-2-P1. Models are the same price.
