The Series DF13 MERV 13 Pleated Filters deliver the high efficiency of a MERV 13 filter without the size and retrofitting requirements of most filters reaching this standard. Designed for direct installation with absolutely no modifications to existing equipment. Utilizing a synthetic media consisting of charged fibers in combination with time-tested filtration principles, the DF13 immediately begins catching airborne contaminants upon installation. This initial layer of dust further enhances the filtering process.

FEATURES

- Charged fibers
- Exceeds LEED®/Green requirements of MERV 13 filtering efficiency
- 100% recyclable paperboard frame

APPLICATIONS

- Great option for earning points toward LEED® certification in new construction.
- Hospitals, universities, industry, commercial applications, and other settings where high efficiency air filtration is a necessity.

SPECIFICATIONS

- Service:** Air.
- Filtration Efficiency:** MERV 13.
- Max. Temperature:** 150°F (65.6°C) continuous operating temperature.
- Recommended Final Resistance:** 1.0" w.g.
