The Series RFT Refrigerator-Freezer Thermometer is a popular choice for easily monitoring temperatures of reach-in refrigerators, cold storage cabinets, and walk-in freezers. The Series RFT refrigerator-freezer thermometers are horizontally oriented to fit discretely in any display cabinet. The Series RFT can be mounted to a wire rack, on the side wall, or left free standing on a shelf. By placing multiple thermometers throughout a location, inspectors can quickly see that a unit is safely within temperature limits. The non-toxic, organic red liquid fill allows users to easily read the temperature settings. The Series RFT thermometer is highly accurate and ruggedly built.

Model RFT-10, Refrigerator-Freezer Thermometer $5.50

The Series SIT Solar Powered Industrial Thermometer accurately measures temperature with no batteries or power cables. For the best possible viewing angle, the stem can be adjusted 180° in the vertical plane and the display housing can be adjusted 180° in the horizontal plane providing a full 360° rotation. Engineering units are field selectable with an external dip switch enabling the thermometer to read from -50 to 300°F or -45 to 150°C. In addition, the large 1/2˝-digit display allows measurements to be easily read across the room. Rated as low as 10 lux, the Series SIT solar thermometer is excellent for reading in low light applications.
