Rate-Master® Dial-Type Flowmeters
Brass Body; Three Ranges to 20 GPM Water

Series RMV Rate-Master® Flowmeters measure higher water flow rates with ±2% of full-scale accuracy at affordable prices. Rugged forged brass housing is standard on all models for great compatibility and the strength to withstand system pressures to 3000 psig (206.7 bar). Unlike glass tube rotameters, these units won’t shatter and they work fine with even dark and/or opaque liquids. Stocked models are fitted with 1 ˝ female NPT inlet and outlet; 3/4 ˝ and/or 1/2 ˝ sizes are also available. Install in line, supported by piping or flush panel mount with complete hardware package included.

APPLICATIONS
Monitor coolant flow through ingot heaters, high-amp switchgear, resistance welders, heat exchangers, compressors, scrubbers; monitor water consumption to different processes and operations for more efficient operation; calculate required fill and drain times for tanks, water towers.

Series RMV II Rate-Master® Flowmeters
For Panel Mounting, Three Ranges to 10 GPM Water

Series RMV II Rate-Master® Flowmeters employ a target-type design combined with a damage resistant magnetic linkage to drive a pointer over an easy-to-read litho scale. This unique construction fully isolates flowing media from gage front for leakproof operation at pressures to 3000 psig (206.7 bar) with 1/2% of full-scale accuracy. Solid machined brass meter body is ideally suited for water flows. Body design fits standard 4 1/2 ˝ hole lay outs per ANSI B40.1. Inlet and outlet threads are standard 3/4 ˝ female NPT.
