Model SSR-15 Intrinsically Safe Relay offers low power switching with solid state reliability and eliminates explosive conditions. Units are completely encapsulated and impervious to dust, moisture, or foreign material. Model SSR-15 can be mounted in any orientation and is shock and vibration resistant.

Model SSR-15, Intrinsically Safe Relay ............................. $206.00

Series SSR Solid State Relays amplify the current handling capability of a variety of sensors for controlling higher power loads. The relays are compact, totally encapsulated and impervious to shock or vibration. Units feature SPST, normally open switch operation and can control loads up to 5A or 10A depending on model.

Models SSR-312 and SSR-324 are specifically designed to provide low current “start-stop” or “on-off” switching for industrial motor, liquid level, and other control systems. Units hold operational state up to a 1/2 second during momentary power loss to cut nuisance shutdowns.

SPECIFICATIONS
Operating and Load Voltage Range: 105 to 125 VAC.
Max. Load Current: 5 Amp.
Switching Operation: SPST normally open.
Sensitivity: Turn-on: 500; Turn-off: 2000Ω.
Temperature Limits: -40 to 120°F (-40 to 49°C).
Voltage Loss: 2 VAC.
Max. Output Leakage Current: 6 mA @ 120 VAC.
Housing: Polysulfone.
Weight: 9 oz (255 g).
