The Model sTDL-10 is a miniature data logger that accurately records temperatures from -40 to 185°F (-40 to 80°C). The submersible, compact data logger features programmable high and low alarms that are indicated with green and red LEDs. Standing only 2.6” (66 mm) tall and 0.7” (18 mm) in diameter, it can record over 32,000 measurements. The easy to use DL700 software makes retrieving data simple and allows for user selectable sampling rates. The sTDL-10 can easily be started and stopped from a PC or delayed to start up to six months in advance.

**SPECIFICATIONS**

Range: Temperature: -40 to 176°F (-40 to 80°C); Memory Size: 32,767 readings per channel.
Accuracy: Temperature: ±0.9°F (±0.5°C); Humidity: ±3%RH.
Resolution: Temperature: 0.2°F (0.1°C); Humidity: 0.5%RH.
Sampling Method: Stop on memory full.
Sampling Rate: Selectable from 2 s to 12 hrs.

**Power Requirements:** 3.6 V TL2150 lithium ion battery, installed functional, user replaceable.
**Battery Life:** 1 yr (approx).
**Interface:** USB port (interface cable required).
**Material:** Aluminum or 303 SS (depending on model).
**Weight:** ISDL-T10: 4 oz (110 g); ISDL-T10-SS: 8 oz (230 g);
ISDL-R10: 5 oz (145 g); ISDL-R10-SS: 10 oz (285 g).
**Agency Approvals:** CE.
