The Model TFLS2 Compact Tuning Fork Level Switch is an ideal choice for level control of powders. The TFLS2 incorporates a piezoelectric crystal that vibrates the fork at its natural frequency. When the fork comes in contact with a material, the vibration is dampened and the switch changes state. As the fork becomes free of material, the switch changes back to its normal state. The unit is not affected by vibration from conveying systems, motors, or the movement of material. Its compact size allows for mounting in places a larger tuning fork level switch may not fit, providing great versatility.

The Model TFLS2 is easy to use with adjustable calibration, and no mechanical moving parts mean no routine maintenance. The TFLS2 is not affected by the dielectric constant of the sensed material, making it superior to a comparable capacitance level switch for applications where the dielectric constant is low, more than one material is being used in the single vessel, and when material moisture content can change. The level switch is also great for applications when the bulk density is too low for a rotating paddle level switch, making it the ideal choice for low density bulk solids and liquids.

### SPECIFICATIONS

**Service:** Dry powder compatible with wetted materials. Can detect bulk materials submerged in liquid.

**Sensitivity:** Minimum bulk solid density: 4.4 lb/ft³ (70 g/l); Maximum particle size: 0.4” (10 mm).

**Wetted Materials:** 316 L SS.

**Ambient Temperature Limits:**
- Ambient: -40 to 140°F (-40 to 60°C);
- Process: -40 to 266°F (-40 to 130°C).

**Pressure Limit:** 600 psi (40 bar).

**Power Requirement:** 20 to 250 VAC, 50/60 Hz.

**Switch Type:** SPDT.

**Power Consumption:** 10 VA.

**Enclosure Rating:** IP65.

**Electrical Rating:** 600 VAC, 0.5 W (max).

**Electrical Connections:** Screw terminals.

**Conduit Connection:** 1” female NPT x 2.

**Process Connections:** 1” male NPT.

**Indication Lights:** Internal: Green and red LED’s.

**Sensing Delay:** 0 to 6 seconds.

**Weight:** 2.4 lb (1.09 kg).

---

The Model CTF Mini Tuning Fork Level Switch is an ideal choice for level control of powders. The CTF incorporates a piezoelectric crystal that vibrates the fork at its natural frequency. When the fork comes in contact with a material, the vibration is dampened and the switch changes state. As the fork becomes free of material, the switch changes back to its normal frequency. When the fork comes in contact with a material, the vibration is dampened and the switch changes state. The unit is not affected by vibration from conveying systems, motors, or the movement of material. Its compact size and DIN connection allow for application in places a larger tuning fork level switch may not be suitable, providing great versatility.

The Model CTF is easy to use with no calibration required, and no mechanical moving parts mean no routine maintenance. The CTF is not affected by the dielectric constant of the sensed material, making it superior to a comparable capacitance level switch for applications where the dielectric constant is low, more than one material is being used in the single vessel, and when material moisture content can change. The level switch is also great for applications when the bulk density is too low for a rotating paddle level switch, making it the ideal choice for low density bulk solids and liquids.

### SPECIFICATIONS

**Service:** Dry powder compatible with wetted materials. Can detect bulk materials submerged in liquid.

**Sensitivity:** Minimum bulk solid density: 4.4 lb/ft³ (70 g/l).

**Wetted Materials:** 304 SS.

**Ambient Temperature Limits:**
- Ambient: -40 to 140°F (-40 to 60°C);
- Process: -40 to 212°F (-40 to 100°C).

**Pressure Limit:** 600 psi (40 bar).

**Power Requirement:** 12 to 55 VDC.

**Power Consumption:** 10 mA @ 12 to 24 VDC; 0.5 W (max).

**Enclosure Rating:** IP65.

**Electrical Rating:** 12 to 55 VDC.

**Electrical Connections:** Screw terminals.

**Conduit Connection:** Valve plug DIN 43650.

**Process Connections:** 1” male NPT.

**Indication Lights:** External red LED.

**Sensing Delay:** Maximum covered probe: 1 to 3 seconds; Uncovered probe: 1 to 3 seconds.

**Weight:** 2.2 lb (1.0 kg).
