Thermohygrometers

**Model THI-10**

**Large Memory, Dew Point and Wet Bulb Temperature Functions**

The Model THI-10 Digital Thermohygrometer accurately measures relative humidity and ambient temperature. Up to 99 readings can be stored in non-volatile memory allowing the HVAC technician to record the data after returning to the office. This compact thermohygrometer also features user selectable engineering units, max/min functions, dew point and wet bulb temperature measurements. The Model THI-10 includes a soft carrying case with a belt loop for easy transportation.

**Model THI-10, Digital Thermohygrometer** .......................... $99.00

**SPECIFICATIONS**

Service: Humidity and temperature detection in air.

Range: Relative humidity: 1 to 99% (non-condensing). Temperature: -4 to 140°F (-20 to 60°C).

Accuracy: Relative humidity: ±3%; Temperature: ±0.9°F (±0.5°C).

Display: Dual LCD display (4 digit upper display / 3 digit lower display).

Temperature Limits: Ambient: 32 to 144°F (0 to 60°C).

Resolution: Relative humidity: 0.1%. Temperature: 0.1°F/°C.

Probe Length: 8" (203 mm) insertion.

Power Requirements: 9 V alkaline battery, included, user replaceable.

Battery Life: 200 hours (approx.).

Weight: 5.6 oz (160 g).

Agency Approvals: CE, RoHS.
