**Series HNV Block Manifold** is a barstock style needle valve that is designed for isolating instruments from liquids or gases. The valve series features fine threading and large seat area to ensure tight shutoff. Wetted materials are 316 SS and PTFE making these ideal for use with corrosives. The HNV has been tested to assure vibration and thermal stability. Body includes a lock pin to prevent accidental bonnet disengagement. The HNV is available in male x male, male x female, and female x female connections from 1/8” to 1”. Tee handle is constructed of 316 SS and allows low torque operation.

**SPECIFICATIONS**

- **Service:** Gases and liquids compatible with wetted materials.
- **End Connections:** NPT.
- **Wetted Materials:** Body and O-ring: 316 SS; Valve spindle: PTFE.
- **Pressure Limits:** 6000 psi (431 bar) @ 200°F (93°C). 4000 psi (276 bar) @ 464°F (240°C).
- **Temperature Limits:** 464°F (240°C).
- **Flow Coefficient:** 0.75.
- **Max. Flow:** Air: 300 LPM; Water: 9 LPM.
- **Weight:** 5.6 oz (158.8 g).

---

**Model TNV**

**PTFE Needle Valve**

All PTFE and PCTFE Wetted Parts

---

The Model TNV PTFE Needle Valve is designed for laboratory and industrial applications for regulating corrosive gases and liquids for high purity services. Media only come in contact with PTFE and PCTFE. Valve spindles are made of ridged PCTFE to minimize “creeping” normally associated with PTFE. The TNV is designed to be used in pressure or non-critical vacuum applications and can be used as a shut off valve.

**Model TNV-1, PTFE Needle Valve (Female x Female)**
