Series UXF1 Ultrasonic Flowmeter Converters are paired with Series SX1 or SX2 sensors in order to utilize the transit-time measuring method. Thanks to microprocessor based electronics, the flowmeter can easily be configured from the front keypad to specific applications. The flowmeter is suitable for liquid flow measurements for pipes from 1/2 inch to 19.5 feet diameter. This flowmeter is a compact and lightweight instrument incorporating the latest electronics and high speed digital signal processing technologies (32 bit MPU), realizing high performance and easy operation.

**Series UXF1 Ultrasonic Flowmeter Converters:**
- Compact and lightweight
- High accuracy
- Excellent resistance against aerated flow
- Quick response with high-speed microprocessor
- Multilingual display (English, Japanese, German, and French)
- Large LCD and function keys
