The Series WVT Vertical Water Meter is a series of rotary piston water meters that display total water usage. The piston displacement technology results in accurate and reliable operation in either horizontal or vertical mounting. Polymer and stainless steel construction provides high durability and environmental resistance at an economical price. The optional pulse output can be used for flow verification and totalization. Adapter couplings are included to convert BSPP threads on the meter to NPT.

**FEATURES/BENEFITS**
- Accurate flow measurement in vertical and horizontal orientations
- Polymer materials prevent corrosion and chemical damage
- Pulse output for flow monitoring
- One-way valve prevents backflow into the meter

**APPLICATIONS**
- Irrigation Flow monitoring
- Water usage in manufactured equipment
- Residential water metering
