

# ATEX/IECEx APPROVED DIGIHELIC® DIFFERENTIAL PRESSURE CONTROLLER

DigiHelic® Pressure Control in Flameproof ATEX/IECEx Enclosure

AT-102NA-DH3, shown with VS0 port/valve configuration

The **Series AT-DH3 ATEX/IECEx Approved DigiHelic® Differential Pressure Controller** is a 3-in-1 instrument possessing a digital display gage, control relay switches, and a transmitter with current output. Combining these three features allows the reduction of several instruments with one product, saving inventory, installation time and money. The DigiHelic® controller is the ideal instrument for hazardous area pressure, velocity and flow applications by allowing for the selection of pressure, velocity or volumetric flow operation in several commonly used engineering units. Two SPDT control relays with adjustable dead bands are provided along with a scalable 4-20 mA process output. In velocity or flow modes, a square root output is provided on the 4-20 mA signal to coincide with the actual flow curve. Flameproof enclosures are available in aluminum and can include a glass window for viewing process information and set point status on the digital display.

## BENEFITS/FEATURES

- Saves inventory, installation time, and money by consolidating several instruments into one ATEX/IECEx approved product
- Flameproof enclosure with optional glass window and aluminum housing protects the device in hazardous areas while giving local visibility to process pressure and set point status
- Increased response time at low pressures with LD port configuration

## APPLICATIONS

- Hazardous area pressure measurement and switching

**Attention:** Check local safety rules and warnings on unit and manual for a correct use of the instrument in hazardous areas.
